Diana S. Mikula - Executive Director

Requirements for Providing Behavioral Supervised Living

Section I. Criteria for Provider Approval for the Provision of Behavioral Supervised Living

In order to provide Behavioral Supervised Living, a provider must first be approved to do so by the Department of Mental Health. The following must be submitted to the Bureau of Intellectual and Developmental Disabilities, Director of Home and Community Based Services, before Behavioral Supervised Living Services may begin:

- A. Documentation and procedures to ensure that the required team members (see Section V) are available to perform required duties.
- B. Documentation and procedures for how the team will address requirements for each Behavioral Supervised Living site.
- C. Documentation and procedures describing that all staff in each approved home have the required training.
- D. Documentation and procedures describing how trained staff coverage for the home, dependent upon the needs of the person/people receiving Behavioral Supervised Living and others who may be living there, will be provided.

Section II. Criteria for Admission

This level of service is intended to support people with high frequency disruptive behaviors that pose serious health and safety concerns to self or others, including destructive behaviors that may or will result in physical harm or injury to self or others. To receive Behavioral Supervised Living, there must be a documented history of the behavior(s) listed below that is likely to reoccur without supervision and structure in the person's living arrangement.

- A. Acts by a person that may have or have caused great emotional harm to self or others (e.g., sexual assault)
- B. Inability of a person to control behaviors to the extent it impedes his/her day-to-day functioning at home, in a community living arrangement and/or at a day program
- C. The person engages in self-injurious behaviors that cause him/her to harm him/herself because of both internal and external stimuli.
- D. 1:1 staffing hours are necessary to ensure the health and safety of the person and/or others

Section III. DMH Specialized Needs Committee

- A. The DMH Specialized Needs Committee, comprised of a representative from an advocacy organization, a Registered Nurse, a Behavior Consultant, and a Licensed Psychologist, will make the determination of whether someone will be approved to receive the Behavioral Supervised Living. BIDD staff will provide administrative support.
- B. All required information must be submitted to the person's ID/DD Waiver Support Coordinator who will then submit it to BIDD via LTSS. BIDD staff will distribute the information to the DMH Specialized Needs Committee. All items that a provider is responsible for gathering must be sent at one time to the Support Coordinator; separate pieces of information will not be accepted.
- C. The Specialized Needs Committee will meet on Mondays at 2:00pm to review documentation received by BIDD, via LTSS, on or before Wednesday of the prior week. Support Coordinators have five (5) days from receipt of information from the provider to submit it to BIDD via LTSS.

Section IV. Required Documentation for Admission

The information needed to justify the service and the party responsible for gathering the data is as follows, depending on where the person currently resides:

Someone Already Receiving Supervised Living		
Information to be Obtained	Party(ies) Responsible for Gathering Information	
A detailed description of the behavior(s) that are occurring or are likely to occur without increased supervision. The documentation must provide evidence that additional staff had to intervene to secure the health and safety of the individual and/or the health and safety of others. Information can come from providers, parents, Support Coordinator, and/or others who have direct contact with the person.	Supervised Living provider	
A listing of the specific actions, including the length of time employed for each, staff who were trained, the type of training staff received, what other services were requested and tried and the outcome of each attempt to mitigate the behavior	Supervised Living provider	
Copies of any Serious Incident reports for the past six (6) months	Supervised Living provider	
Service Notes for the past two (2) months from all providers of all services the person receives	Supervised Living provider/ Support Coordinator	
A complete list of all medications the person receives	Supervised Living provider	
Documentation obtained from any medical providers (including psychiatrists) during the previous three (3) months or any other medical documentation deemed relevant to the situation	Supervised Living provider	
Other documentation/information deemed relevant to support the request (information from a CMHC, other providers, etc.)	Supervised Living provider/Family/Other providers

Someone Moving from Home and Requesting Behavioral Supervised Living	
Information to be Obtained	Party(ies) Responsible for Gathering Information
Committee to make a determination as to whether the service will be approved.	

Section IV. Staff Requirements for Behavioral Supervised Living

- A. Providers of Behavioral Supervised Living must have a team that consists of:
 - 1. A Ph.D. psychologist, with specialized training in supporting people who have IDD and behavioral challenges, to approve the Functional Behavior Assessment and Behavior Support Plan and to be available for consultation when adjustments may be needed (can be on contract)
 - 2. Someone who meets the qualifications of a Behavior Consultant who can conduct the Functional Behavior Assessment, develop the Behavior Support Plan, and provide necessary training to staff/family on implementation of the Behavior Support Plan.
 - Someone who meets the qualifications for a Behavior Interventionist to assist the Behavior Consultant in collecting data and providing training to staff/family on how to implement the Behavior Support Plan and training and, for Direct Support Staff, how to complete Behavior Reports.
 - 4. Direct Support Staff with specialized, documented training in a nationally recognized program for managing aggressive or at-risk-to-self behavior.

Section V. Staff Training

- A. All staff who have any direct contact with the person must be Mandt© certified or hold another nationally recognized credential prior approved by the DMH. The credential must be obtained before the staff can begin working with the person.
- B. All staff working with the person must receive timely person-specific training before the person moves into the home. If a person is already living in the Supervised Living arrangement, the Behavior Consultant and/or Behavior Interventionist will train/re-train staff once the Behavior Support Plan is developed.
- C. Documentation of Staff Training
 - 1. Documentation of Mandt© or other nationally recognized training must be in the personnel record.
 - Documentation of person-specific training must be signed and dated by the staff receiving the training as well as the person providing the training. For people moving from an institution, staff that has been serving the person may provide the training.

Section VI. Additional Documentation Requirements for Behavioral Supervised Living (DMH Record Guide requirements must also be followed)

A. For people moving from home or already living in the Supervised Living setting, the Behavior Consultant must begin the Functional Behavior Assessment (FBA) upon notification from the Support Coordinator that Behavioral Supervised Living has been approved for the person. The FBA must be completed within fifteen (15) days of the

- notification of approval for the person to begin Behavioral Supervised Living. The Behavior Support Plan must be completed within fifteen (15) days of the completion of the FBA.
- B. Service Notes must reflect the person's and the staff's activities throughout the day, with at least one entry every two (2) hours while the person is awake and in the home. Overnight entries can be every four (4) hours. Service Notes must also reflect when and the amount of time a person receives 1:1 staffing.
- C. Data must be collected as directed by the Behavior Consultant.
- D. There must be Quarterly Review Reports that reflect the supports provided and the amount of progress made during each quarter. Based on data gathered during each quarter, the Behavior Consultant composes a report that reflects target behavior(s), medication changes, information about Behavior Support Plan implementation, and narrative information about baseline data, data from the previous Quarterly Review Report, and narrative information about the current quarter's data.
- E. The Quarterly Review Report must include next steps to be taken in implementation of the Behavior Support Plan. Next steps could include actions such as continuing with the Behavior Support Plan as it is written or modifying it to meet any changing needs. Modifications can be made to the intervention, intervention techniques, target behaviors, training needs, timelines, etc.

Section VII. Provider Responsibilities for Services Provided Away from the Behavioral Supervised Living Home

- A. The provider must be prepared to send staff with the person to his/her day activities in order to ensure continuity for the person. The Behavior Consultant and/or Interventionist must train staff wherever the person is during the day how to manage behavior(s) that are identified in the Behavior Support Plan. This is true even if the provider of day services is different than the provider of Behavioral Supervised Living. As long as the person is in Behavioral Supervised Living, it is the responsibility of the provider to ensure the Behavior Support Plan is implemented where the person goes during the day. This can be done by the Behavior Consultant/Interventionist or direct care staff, depending on the situation.
- B. Once staff has been trained and the identified behavior(s) begin to mitigate, the Behavioral Supervised Living staff can be faded. However, the situation must be monitored. If changes in the person's behavior(s) occur, Behavioral Supervised Living staff must return to the setting where the behaviors are occurring and either retrain staff or revise the Behavior Support Plan.

Section VIII. Ongoing Review of Need for Behavioral Supervised Living

- A. The DMH Specialized Needs Committee will determine the need for ongoing Behavioral Supervised Living at least annually.
- B. The following documentation must be submitted to the person's Support Coordinator within ninety (90) days of the end of a person's certification period. The Support Coordinator will submit the documentation to the DMH Specialized Needs Committee within five (5) days of receipt of all required documentation. All documentation must be received by the Support Coordinator at one time; partial submissions of required information will not be accepted.
 - 1. Service notes (previous three (3) months)
 - 2. Serious Incident reports (previous six (6) months)

- 3. Behavior Reports (previous six (6) months)
- 4. Functional Behavior Assessment (for 1st annual review)
- 5. Behavior Support Plan for 1st annual review
- 6. Quarterly Review Reports (previous two (2) quarters)
- 7. Documentation of staff training (Mandt © or other approved training certificates for all staff and as well as person-specific training)

Section IX. Use of Other Behavior Services

- A. People who receive Behavioral Supervised Living <u>cannot</u> also receive Behavior Support, Crisis Intervention or Crisis Support services. The goal is for the provider's Behavioral Supervised Living Team to be able to resolve/mitigate issues/behaviors where the person lives/receives day services. Alternate living arrangements may be used for short term purposes.
- B. If the issue is determined to be a medication issue which requires medical intervention, Crisis Support may be considered. There must be adequate supporting documentation and it must be prior approved by BIDD.
- C. If a provider refers people receiving Behavioral Supervised Living to Crisis Support, the provider's ability to render the service may be suspended and the person referred to another provider.
